Sage Energy Awarded Contract to Support EPA Climate Change Division

ANNAPOLIS, MD—October 9, 2007—Sage Energy Consulting, LLC (Sage Energy) announced today that it was awarded an indefinite-delivery/indefinite quantity contract to provide the U.S. Environmental Protection Agency (EPA), Office of Air and Radiation, Climate Change Division with technical and outreach support services for domestic and global climate change programs.

The contract has a one-year base period of performance, four one-year options and a total ceiling value of \$27 million if the customer exercises all options. Sage Energy is part of a team that was one of six awarded the contract.

Sage Energy will perform tasks as required on this contract including: climate science impacts and adaptation, economic analysis, emissions modeling, international capacity building, technology evaluation, energy markets assessment, Web development, program support, outreach and program evaluation. Sage Energy's efforts will focus particularly on energy efficiency, renewable energy and green building. After many years of climate change-related work supporting governmental and non-governmental clients, this contract represents Sage Energy's first contract as a sub-contractor to SAIC and to EPA's Climate Change Division.

"Global climate change is a critical environmental and economic issue," said Geri Nicholson, Sage Energy President. "The EPA is at the forefront of the U.S. effort to tackle global climate change, and Sage Energy is pleased to bring its market approach to reducing GHG emissions while keeping the economy growing."

Sage Energy is a leading expert in energy efficiency and renewable energy project management and project development to commercial clients, providing energy efficiency, renewable energy, and green building solutions that improve the bottom line. Sage Energy also develops greenhouse gas inventories and climate change strategies that position its clients for upcoming regulations and highlight their commitment to the environment.

About Sage Energy Consulting:

Sage Energy Consulting, LLC specializes in developing successful energy sector strategies that substantially improve the environment and the bottom line for commercial clients. Sage Energy assists them to surpass their objectives in the areas of energy efficiency, renewable energy, climate change and green building. Sage Energy offers the unique perspective and experience of drafting regulations and policies to achieve government sector goals and mandates, and then applying this government sector perspective toward maximizing value for its commercial customers.
